

EDUCATION

B.Tech CSBS --	Sri Eshwar College of engineering	8.50(4th-sem)	2024-2028
HSC(+2)	-- Srinivasa Vidhyala Matric Higher Secondary School	90.5%	2022-2024
SSLC	-- Srinivasa Vidhyala Matric Higher Secondary School	79.4%	2021-2022

INTERNSHIPS

MLOps Intern - Sri Eshwar College of Engineering	June 2026
--	-----------

Built an end-to-end MLOps pipeline for FloodGuard AI, an urban flood prediction platform, covering data versioning, experiment tracking, and automated model deployment. Implemented REST API-based model serving with fallback mechanisms, Docker containerization, and CI/CD workflows. Set up monitoring for model drift and API performance to ensure reliability.

Data Analytics,AI &Web Development Intern - NIELIT	December 2025
--	---------------

Worked on data analytics and AI-driven solutions using Pandas, NumPy, Matplotlib, OCR, and YOLO, alongside full stack web development using Django, MySQL, and MongoDB. Implemented authentication, CRUD operations, and REST APIs while building responsive, database-driven applications with computer vision integration.

PROJECTS

FloodGuard AI — Urban Flood Risk Prediction & Response Platform	GITHUB	2026
---	------------------------	------

Tech Stack: React, FastAPI, MongoDB, MLflow, Scikit-Learn, Docker, GitHub Actions

Engineered an end-to-end MLOps pipeline for real-time urban flood risk prediction, integrating rainfall, drainage, and river-level data through a pluggable ML architecture (Scikit-Learn, MLflow). Implemented CI/CD with GitHub Actions, containerized deployment via Docker, and automated drift detection using Evidently AI. Designed for scalability, enabling seamless upgrades from rule-based logic to trained ML models without disrupting production

MindScape AI — AI-Driven Mental Wellness Platform	GITHUB	2026
---	------------------------	------

Tech Stack: Python, Streamlit, TextBlob, Rasa, Plotly, SpeechRecognition, pytsx3

Built an intelligent emotional wellness companion using Python and Streamlit, combining NLP-based sentiment analysis (TextBlob) with a hybrid dialog engine (Rasa + heuristic fallback) for zero-downtime AI conversations. Developed rule-based clinical scoring and burnout prediction models with real-time analytics dashboards. Engineered a crisis-detection system with adaptive UI and automated safety alerts, prioritizing user wellbeing through explainable AI.

JarvisFi — Multilingual AI-Powered Financial Platform	GITHUB	2026
---	------------------------	------

Tech Stack:Python, Streamlit, FastAPI, Hugging Face, IBM Watsonx, RAG, Redis, Celery, JWT

Developed a comprehensive financial intelligence platform combining a RAG-based conversational assistant (Hugging Face, IBM Watsonx) with 15+ interactive financial calculators, voice interaction (STT/TTS), and domain-specific tools for farmers, students, and professionals. Supported 4 languages (English, Tamil, Hindi, Telugu) with real-time translation and demographic-aware financial guidance. Architected with enterprise-grade AI integration and RBI/SEBI-compliant document retrieval for accurate, explainable financial recommendations.

ACHIEVEMENTS

- Top 15, Guidewire DevTrails Hackathon 2026 — Guidewire
- 1st Runner-Up, Paper Presentation — CIT (2026)
- 2nd Runner-Up, Coding Relay — CIT (2026)
- 2nd Round Finalist- StartupTN Ecospark (2025)
- Top 10 Recognised Team -GenAI 24-Hour Hackathon (2025)
- Finalist - ZeroDay 24-Hour Hackathon (2025)

CERTIFICATIONS

- Claude Code in Action — Anthropic (2026)
- AWS Cloud Practitioner Essentials (2026)
- Model Context Protocol — Anthropic (2026)
- Django Full Stack Web Development with Python — Udemy
- ServiceNow AI Foundation Specialist - ServiceNow(2026)
- Mastering Power BI Report Design — Udemy
- SQL (Basic & Intermediate) — HackerRank (2025)
- C & CPP Programming — IIT Bombay Spoken Tutorial (2024)

CODING PROFILES

- LeetCode — 120+ Problems Solved
- SkillRack — 1000+ Problems Solved, 279+ Bronze Badges
- HackerRank — Bronze Badge
- CodeChef — Bronze Badge

SKILLS

- Languages: Python, Java, C, C++, JavaScript
- Databases: MySQL, MongoDB, SQL, DBMS
- Web & APIs:React.js, Node.js, Express.js, REST API, FastAPI, Django
- AI/ML & Data: NumPy, Pandas, Scikit-Learn, OpenCV, LLM APIs, Power BI
- Cloud & DevOps: AWS (EC2, S3), Docker, GitHub Actions, CI/CD, DVC, MLflow
- Core CS: OOP, DSA, System Design, SDLC, Agile
